

JavaScript - Loops & Conditions (Short Explanation)

For Loop

Repeats block a specific number of times.

```
for(let i=0;i<5;i++){  
  console.log(i);  
}
```

Commonly used in web scripting for dynamic content.

Practice: Print numbers 1–10 on webpage.

While Loop

Executes as long as condition is true.

```
let i=1;  
while(i<=5){  
  console.log(i);  
  i++;  
}
```

Ensure loop variable updates.

Practice: Print countdown 10–1.

If-Else

Used for decision-making in webpages.

```
if(age>=18)  
  console.log('Adult');  
else  
  console.log('Minor');
```

Evaluates conditions using logical operators.

Practice: Check if number entered is positive or negative.
